For purposes of this example, we assume \$100,000 is allocated to an S&P 500® 1-year Term with Cap strategy with a 13% cap, and \$100,000 is allocated to an S&P 500® 1-year Term with Participation Rate strategy with a 75% upside participation rate. Hypothetical caps and upside participation rates applied for each of the one-year terms, because historical caps and upside participation rates for this product, which was first offered in May 2019, are unavailable. The 50% downside participation rate applied for each of the one-year terms. Strategy allocation did not change and no withdrawals were taken during entire period. Data shown is based on the performance of the S&P 500 Price Return Index (SPX) from 1/1/2000 through 12/31/2018. A different set of assumptions would lead to different results, which could be significantly different from the hypothetical strategy values and returns shown in this example.
